PROFILE

Aspiring Data Scientist with expertise in Machine Learning, Deep Learning, and Data Analysis. Experienced in developing intelligent assistants, automation workflows, and predictive models. Passionate about leveraging data and AI to solve real-world problems and drive smarter decisions.

EDUCATION

SRM University, Chennai	2024 – Present
MCA – Master of Computer Applications	CGPA: 9.4
Techno India College of Technology, Kolkata	2021 – 2024
BCA – Bachelor of Computer Applications	CGPA: 8.5

PROJECTS

AI Vision Assistant (EDITH) Python, OpenCV, Speech AI, LLM APIs

- Developed an AI assistant capable of understanding voice commands and analyzing live camera input.
- Implemented real-time object detection and scene understanding using computer vision techniques.
- Integrated speech-to-text and text-to-speech for natural voice-based interaction.
- Connected LLM APIs and automated workflows using n8n to deliver intelligent responses and task execution.

Banking Transaction Analysis & Fraud Risk Detection Python, MySQL, Power BI

- Analyzed banking transaction and customer data to identify spending patterns and financial trends.
- Cleaned and transformed large datasets using Python and managed structured data with MySQL.
- Performed exploratory data analysis (EDA) to detect anomalies and potential fraud risk indicators.
- Developed Power BI dashboards to visualize KPIs and deliver actionable business insights.

AI-Powered Medical Assistant Python, Groq API, Gradio, ElevenLabs, Pandas, NumPy

- Developed an AI assistant that provides symptom-based guidance and answers health-related queries.
- Integrated Groq API for fast LLM responses and built an interactive web interface using Gradio.
- Enabled voice interaction using ElevenLabs and utilized Pandas and NumPy for efficient data handling.

Breast Cancer Prediction Model Python, Scikit-learn

- Built ML models to classify tumors as benign or malignant.
- Compared multiple algorithms and selected the best model using F1-score.
- Performed data preprocessing and visualization for improved accuracy.

TECHNICAL SKILLS

Programming: Python, JavaScript
Machine Learning: Supervised & Unsupervised Learning
Deep Learning: TensorFlow, Keras, CNN, RNN, ANN, NLP
AI & Automation: LLM Integration, n8n Workflow Automation
Data Analysis: Power BI, Data Visualization
Databases: SQL, MongoDB
Tools: VS Code, Git, GitHub
Operating Systems: Windows, Linux, Unix

CERTIFICATIONS

Python for Machine Learning — National Seminar/Workshop (2024)
Introduction to Natural Language Processing (NLP) — Coursera/Udemy (2025)
